Policy Statement

The objective of this policy is to avoid counterfeit parts entering WestBank Businesses supply line.

Counterfeit parts are those Electrical and Electronic parts that are copied, substituted, recycled, refurbished or rejected but are represented as new products.

WestBank Businesses recognise that the counterfeiting of components is a serious problem that harms the worldwide economy and jeopardises the safety of individuals.

WestBank Businesses is committed to providing quality products and will procure its components and product from its major franchised Supply Partners or their approved distributors.

WestBank Businesses is certified to BS EN ISO9001:2015 and has an Approved Supplier List which is monitored.

In exceptional cases, such as obsolescence, materials or products may need to be sourced from non-approved suppliers or distributors.

In such instances, our established processes and expertise will be rigorously applied to ensure the authenticity and quality declaration or certificate of any procured items, verifying they are of original manufacture.
